Experience

Senior Product Experience Designer III

Dynatrace — Feb. 2023 - Present

- Led pattern governance for enterprise design system, driving 90% immediate adoption across 8 to 12 core development teams.
- Established GUIDE, a UX review framework to audit UX inconsistencies, accessibility gaps, and friction points across the platform.
- Improved designer satisfaction scores by 43% through pattern documentation and actionable implementation references.
- Owned Figma component libraries end-to-end: complex components, data visualization and iconography.
- Prototyped and coded design proofs to validate implementation patterns and ensure cross-team technical compatibility.
- Facilitated ”pattern qualifier” sessions and workshops to drive adoption and build contributor momentum.
- Pioneered an internal AI-agent playbook to govern and enforce UI consistency at scale.

Senior Design System Designer

Stuart Delivery — Oct. 2021 - Nov. 2022

- Owned end-to-end Figma component libraries for a multi-platform design system spanning React, SwiftUI, and Flutter, maintaining full backward compatibility across all three.
- Proposed a federated model for collaboration as the strategic solution, presenting directly to VP of Product, VP of Technology, and Director of Design to get buy-in.
- Established a ”Design System Champions” program, distributing ownership across product teams to drive adoption and reduce dependency on a central team.
- Maintained Figma libraries for platform-agnostic and specifics as the single source of truth for design decisions.

UI Architect (Design Systems)

FOSH Tech — Oct. 2020 - Apr. 2021

- Embedded with distributed teams across Latin America, Europe, and North America to audit, modernize, and implement a unified design system under a single umbrella brand.
- Delivered 60% faster feature implementation through reusable components and a scalable design token system covering primarily color, typography, and sizing.
- Migrated 35+ components to modern architecture, achieving 40% reduction in bundle size.
- Led knowledge-sharing sessions across design, engineering, and marketing teams.

UI Engineer (Design Systems)

GIG — Feb. 2019 - Sep. 2020

- Built a white-label Vue.js UI kit serving 15+ clients, reducing time-to-market from 6+ months to 60 days.
- Architected CSS Custom Properties theming system via Shadow DOM, enabling brand isolation per instance.
- Led 5+ major theme implementations, while conducting live-coding workshops for clients and new hires.
- Improved platform load performance by 40% through Shadow DOM encapsulation and render optimization.

Skills

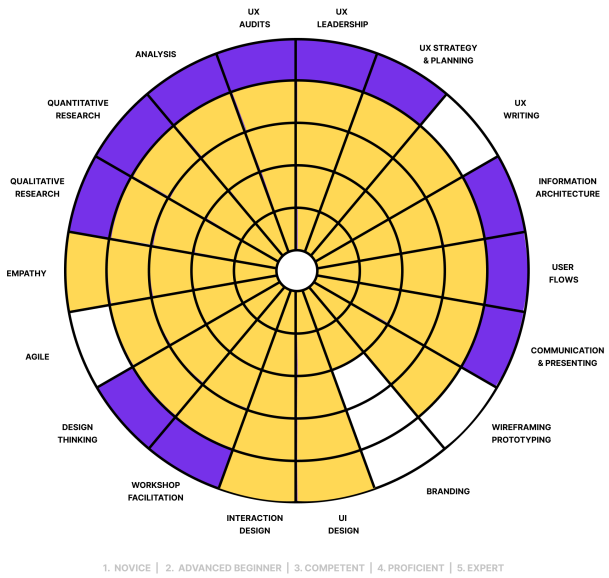
- Iterative, user-centered, attention to detail
- Proactive in identifying needs and opportunities
- Team and community oriented, time management capacity
- Design engineering, systems thinking
- Figma, Whiteboards, CSS, JavaScript, SVG, Git
- Test-driven continuous iteration
- Fluent in Spanish and English. Very little German

Education

BA Graphic Design

UAI — May 2010 - Feb. 2014

- Visual Communication, Sciences of Communication.
- Teaching Assistant: Visual Communication I, II, III.

More about me


I've spent the last 8 years living and working across Europe, building design systems that actually get used. I'm at my best when I own the whole thing: Figma architecture, pattern logic, stakeholder buy-in, adoption metrics. I like the craft and I like the strategy. Multi-platform work is where I've spent most of my time: web, iOS, Android, all three at once. I spot what needs fixing and I fix it. I don't wait to be asked.
